

## Project Design Phase-II Technology Stack (Architecture & Stack)

|               |  |
|---------------|--|
| Date          | 03 October 2022                                      |
| Team ID       | PNT2022TMID49070                                     |
| Project Name  | Emerging Methods For Early Detection of Forest Fires |
| Maximum Marks | 4 Marks  |

### Technical Architecture

**Table-1 : Components & Technologies:**

| S.No | Component                            | Description   | Technology   |
|------|--------------------------------------|---|--|
| 1.   | User Interface                       | The user uses the console to access the interface   | Python/HTML ,CSS , Javascript and react.Js   |
| 2.   | Input                                | Video Feed  | Web Camera/Video on a site   |
| 3.   | Conversion                           | Video inputted is converted into Frames   | Frame Converter  |
| 4.   | Feeding the Model                    | The Frames are sent to the Deep learning model  | Our Model  |
| 5.   | Dataset                              | Using Test set and train set , train the model  | Data set from Cloud Storage , Database   |
| 6.   | Cloud Database                       | The model is trained in the cloud more precise with detections more images can be added later on.                 | IBM Cloudant ,Python Flask.  |
| 7.   | Infrastructure (Server / Cloud), API | Application Deployment on Local System / Cloud<br>Local ,Cloud Server Configuration , Twilio API to send messages | Java/python ,React.Js ,JavaScript ,HTML ,CSS ,IBM Cloud ,OPEN CV ,Anaconda Navigator ,Local. |

**Table-2: Application Characteristics:**

| S.No | Characteristics          | Description  | Technology   |
|------|--------------------------|--|--|
| 1.   | Open-Source Frameworks   | Python Flask framework is used   | Technology of Opensource framework   |
| 2.   | Security Implementations | Mandatory Access Control (MAC) and Preventative Security Control is used | e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.  |
| 3.   | Scalable Architecture    | High scalability with 3-tier architecture                                | Web server – HTML ,CSS ,JavaScript<br>Application server – Python , Anaconda<br>Database server –IBM DB2 |
| 4.   | Availability             | Use of load balancing to distribute traffic across servers               | IBM load balancer  |
| 5.   | Performance              | Enhance the performance by using IBM CDN                                 | IBM Content Delivery Network   |
